Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

GERALDINA VISCONTI
PRIMARY EXAMINER

This office action is responsive to the Amendment and Remarks filed 16 May 2007. Claim 35 has been added. Subsequently, claims 1-35 are pending in this application. However, claims 18-34 were withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention. Claims 1-17 and 35 are presently under consideration.

Response to Arguments

1. Applicant's arguments with respect to claims 1-17 over each of Tanaka et al. ('530) and Fukuchi et al. ('359) have been considered but are moot in view of the new ground(s) of rejection.
2. In response to applicant's argument that the previously references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies, i.e., peeling said film from said substrate and then drying said film, are not recited in claims 1-17. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1752

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-17 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Lu et al. (U.S. Patent Application Publication No. 2004/0105994).

Lu et al. ([0076, 0006], claims) discloses a method of forming a film by casting a polymer solution on a substrate, followed by heating said substrate and a condensing step, characterized in that: the substrate is heated with the use of a heater disposed in close proximity along the back of the substrate, and the solvent from the polymer solution is condensed from the film and thereby recovered.

5. Claims 1-17 and 35 rejected under 35 U.S.C. 102(e) as being anticipated by either Yamada et al. (U.S. Patent No. 7,141,304) or Yamada (U.S. Patent Application Publication No. 2006/01067201).

Each of Yamada et al. (column 7, line 8; claims) and Yamada ([0031], [0048], claims) discloses a method of forming a film by casting a polymer solution on a substrate, followed by heating said substrate and a condensing step, characterized in that: the substrate is heated with the use of a heater disposed in close proximity along the back of the substrate, and the solvent from the polymer solution is condensed from the film and thereby recovered.
